

Rapid Test Solutions

Kikkoman offers a wide range of rapid and effective technologies to optimize your food testing needs.

ATP Rapid Hygiene Monitoring Lumitester Smart & LuciPac A3

"Kikkoman's A3 Technology is a higher sensitivity hygiene test due to its ability to detect ATP + ADP + AMP - a method that has been proven to detect what other similar tests miss.

A3 technology is your first choice for high performance."

Easy Plate™ AC

For Aerobic Bacteria

Easy Plate™ CC

For Coliform Bacteria

Easy Plate™ EC

For *E. coli* & Coliform

Easy Plate™ SA

For *Staphylococcus aureus*

Film Media for Microorganism Testing Easy Plate

"Pre-prepared, ready-to-use microbiological film-style media that saves time, saves waste and simplifies your laboratory workflow."

Allergen Testing Allergeneye Immunoassay

"An Effective, Accurate and Sensitive One-Hour
Immunoassay for Common Allergens in Food."

-  Egg
-  Milk (Casein)
-  Milk (Whey)
-  Wheat
-  Buckwheat
-  Peanut
-  Crustacean
-  Soy
-  Sesame

Histamine assay Histamine Test & Histamine Check Swab

"AOAC Performance tested program validated Rapid and Easy Test for Histamine in
Fish and Fish Products - from Sample to Result in about 1 hour."
"Rapid 5 Minute Screening with Histamine Check Swab."

ATP-based microbial assay Lumitester C-110 & CheckLite Series

"CheckLite Series is based on the rapid, effective and
proven ATP technology for bioburden detection."
